

Dear Diane and Windsor Garden Club members:

On behalf of CRIS Radio, I want to thank you and your Windsor Garden Club members for transforming the front and rear portions of our broadcast facility on Saturday, May 2, 2015.

We are delighted with all of the work, particularly with the addition of the plants near the CRIS stand-alone sign. The color of the plants selected by the club will highlight the sign's appearance on the street, improving the overall street view of our facility.

It was impressive to come into CRIS on Monday morning to see the new plantings by the sign, but also the significant improvement of the plantings near the front and rear of the building as well. Tremendous work to remove the weeds, pruning some existing plants, and transplanting some plants really made for a very improved appearance of our facility.

Please thank the volunteers who personally worked on our building. Know that it is greatly appreciated, and helped save CRIS Radio, a 36-year-old nonprofit, much needed funds.

Best,

Diane
